

SHRP2 3D Database

- Reliable and accurate data on the location and depth of utilities, and a storage system from which to retrieve the data, is necessary for efficient and cost-effective project delivery. Utility data is frequently not stored in accessible formats so that it can be saved and reused for future projects, causing agencies to recreate the data. A system is needed to store and retrieve utility data using enterprise technology that works with existing agency databases and systems.
- Goal is to get company submitted data, SUE locates, utilities from surveys and field verification all into a GIS environment that can be easily viewed in multiple sources (Webmap, ArcMap, MicroStation)

- SHRP2 Utility Database
- Requires ArcGIS Online account
- Convert MicroStation surveys to GIS format. Web Viewer
- Allows for field collection via the Collector app
- Survey grade x,y,z still being worked on. Testing Emlid RS2

What's Next?

- Acquire Emlid RS2 as a cost effective (\$2,000) method of collecting survey quality data through Collector.
- Get some regulations and requirements in place when facilities go in our right of way. Currently we have very little idea what resides on our own property.

SHRP2 3D Workflow Architecture

Mitchell Masarik

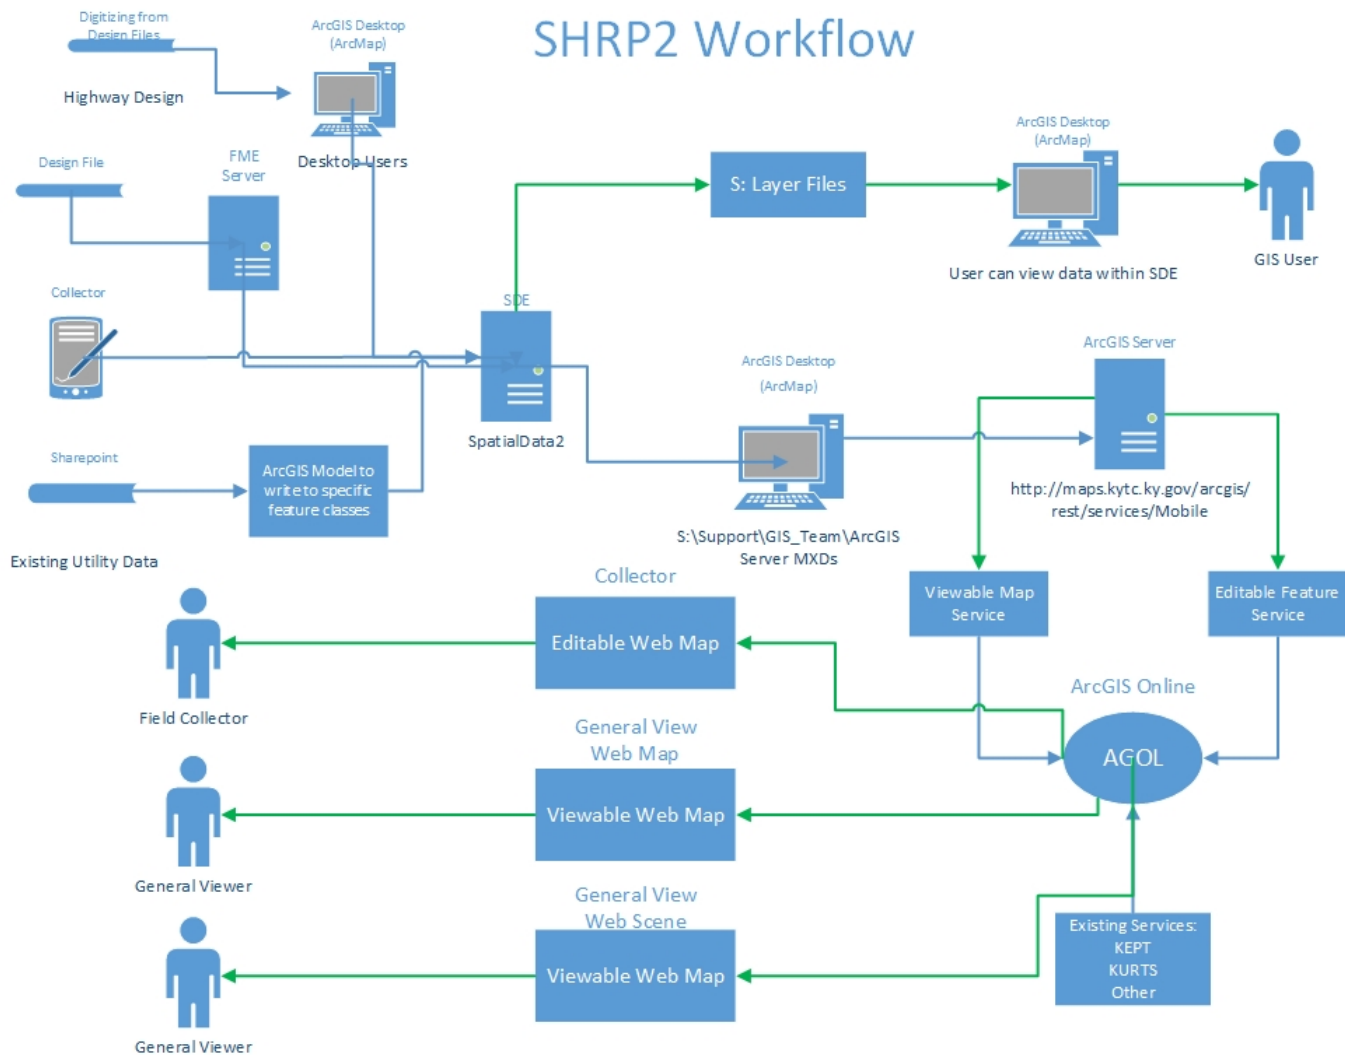

Software Products Used

- ArcSDE (ESRI)
- ArcGIS Server (ESRI)
- ArcGIS Online (ESRI)
- Collector for ArcGIS (ESRI)
- Web App Builder (ESRI)
- Web Scene Viewer (ESRI)
- FME (Safe Software)

SHRP2 Workflow

ArcSDE

- Single SQL Server Database that contains a 1-1 match between CADD levels and SDE feature classes
- Points, lines, polygons
- Z Values enabled
- Attachment Enabled
- Editor Tracking Enabled

S:\Support\GIS_Team\SDE_DNS_Connections\03-SD2\ArcGISServer\PRD-SD2-KYTCDynamic_RC

Catalog Tree

ArcGIS Server

- Single secured service for accessing all assets within the database
- Uses REST API to view and edits layers that are stored within the SQL Server database

[JSON](#) | [SOAP](#)

Mobile/SHRP2_Ext_Mob_Prd (FeatureServer)

View In: [ArcGIS Online map viewer](#)

View Footprint In: [ArcGIS Online map viewer](#)

Service Description: SHRP2 3D database for collecting utility information

[All Layers and Tables](#)

Has Versioned Data: true

MaxRecordCount: 1000

Supported Query Formats: JSON, AMF

Supports Query Data Elements:

Layers:

- [WL - Water Line](#) (0)
- [WT - Water Tower](#) (1)
- [WW - Water Well](#) (2)
- [WM - Water Meter](#) (3)
- [WS - Water Spigot](#) (4)

- [FH - Fire Hydrant](#) (8)

ArcGIS Online (AGOL)

- ESRI's cloud environment
- Allows for easy hosting of data and applications
- Contains many simple out of the box tools to create effective workflow
