LIMS \ Receive Sample at Destination Lab

Receive Sample at Destination Lab Window Description

The Receive Sample at Destination Lab window is used to receive samples at the destination lab. When samples are created, the users will indicate what destination lab(s) the sample will be shipped to for testing. In most cases, destination labs first receive the sample. However it is possible to indicate that a destination lab be skipped and directly sent to the lab units.

The Receive Sample at Destination Lab window will display all the samples that are yet to be received by the destination lab as shown in the following Layout section. The drop down list for Select Sample Location contains a list of all destination labs defined in LIMS. The system will select the destination lab the user had selected during the previous session and displays all samples that were created for the particular lab that are not received yet. Samples are limited by the contract authority of the user logged in to the system. . If a sample has no contracts associated, it will be available to any user who meets the other security conditions. Users can use the Filter Criteria option on the window to further limit the number of samples displayed

Procedure

KYTC decided not to use this window.

Field Table

Field Name	KYTC Population Policy & Procedure
Select Sample Location	Name of the destination lab where samples are being received. The drop down list contains all the destination labs.
Sample Received	Check box to indicate that a sample was received
Lab Control Number	Lab Control Number for the sample
Lab Reference Number	The Lab Reference Number

Field Name	KYTC Population Policy & Procedure
Control Number	Control Number for the sample
Sample ID	The sample ID that is waiting to be received
Contract ID	Comma separated list of all contracts assigned to the sample
Seal Number	Seal number for the sample ID
Log Date	Date when the sample was logged
Sampler	User ID of the sampler
Material Name	Name of the material for which the sample is taken
Sample Type*	The type of Sample.
Sample Date	The date when the sample was taken
Geographic Area*	Geographic Area where the sample was taken.
P/S Code	Producer Supplier code for the sample
Plant ID	Plant ID for the sample
Product Name	Name of the product for the sample
Sample Requester	User ID of the person requesting the sample
Toolbar ~ Remarks	Enter/View remarks associated with the selected sample
