Standard Sample Remarks Window

Navigation

Main Panel \ Materials Management \ Sampling and Testing \ Standard Sample Remarks

Find Sample Window Description

The Standard Sample window is used to add optional standard remarks that will be included in the Lab Report for samples that have the Include Standard Remarks checkbox checked on the Sample Information window.

The codes in the Code Description window are maintained in the System Tables Maintenance window.

Procedure

The user populates the code descriptions with a standard remark.

Field Table

Field Name	KYTC Population Policy & Procedure
Code Description	The code descriptions in the SMPLSTAT table will be maintained by the System Administrator.
Remarks	The Remarks will be maintained by the System Administrator. - PENDING: The sample has been taken. All test results may not be complete. - COMPLETE: All sampling and/or testing criteria have been satisfied. - FAILED: Material did not meet specification requirements. See detailed remarks. - FAILED AND REMOVED FROM PROJECT: Material did not meet specification requirements. This status does not count toward meeting Contract Sampling and Testing requirements. See detailed remarks.
