

Listed below are corrections and clarifications for projects included in the Kentucky Transportation Cabinet's Procurement Bulletin for Engineering and Related Services, Bulletin No. 2000-03 dated September 23, 1999.

Pike County - 12-66.00 - Added under Prequalification Requirements:

GEOTECHNICAL

- Laboratory Testing
- Drilling
- Engineering

STRUCTURES

- Spans > 500 feet
- Spans < 500 feet
- Culvert Design

Three pages of Meeting Minutes - SOUTHERN KENTUCKY CORRIDOR (I-66) PIKE COUNTY, KENTUCKY AND MINGO COUNTY, WEST VIRGINIA - have been added to this site.

A couple of questions regarding the I-66 project advertised in Bulletin 2000-03:

1. Is the 2-mile wide environmental overview, that BLA has been asked to do, centered on the recommended alternate shown in their location study?
2. MAPPING: When can we expect mapping to be completed? Is the corridor to be mapped centered on the BLA's recommended alternate? How wide of a corridor will be mapped?

Answer:

Yes, the overview and additional work that BLA has been asked to do is centered around the work that they have already performed. We hope that the additional work that they will perform will help us refine the potential corridor so we can lessen the width of mapping that is required. Mapping would be anticipated to be available next summer.

Mr. Stephen A. Williams, P.E.
Director
