

[2009-01 - Kenton 6-361.00, 6-362.00 & 6-363.00](#)

QUESTION: Traffic Engineering is not listed as a prequalification for the Kenton County projects. Since all intersections are signalized, is the cabinet handling all signal design?

ANSWER: Any necessary traffic engineering, including signal design, will be performed by the department. No prequalification in Traffic Engineering or Electrical Engineering is required.

[2009-01 - Hardin Co. - New Route - 4-8103.50](#)

CLAIRIFICATION: Photogrammetry: The department will provide aerial survey files The Consultant will be responsible to field survey the project tie-ins.

[2009-01 - Hardin Co. - New Route - 4-8103.50](#)

CHANGE: Leo Frank, P.E. will be the User Division representative on the selection committee in place of Bob Farley, P.E. This change is made to even out the work load in the Division of Highway Design.

[2009-01 – Statewide Aviation Services](#)

QUESTION: Are the selection committee members correct on the Statewide Aviation ad?

ANSWER: Yes. Jadie Tomlinson P.E. works for the Division of Traffic and Wayne Simpson, P.E. work for the Division of Maintenance. They are the user representatives because they are both engineers with aviation experience.

[2009-01 - Hardin Co. - New Route - 4-8103.50](#)

QUESTION: Please clarify the length of the Project and its ending points? The map shows that the project area begins at where KY 313 currently ends near KY 1500 and the length of the oval study area is approximately 4 miles, but the RFP says the project is 2 miles. The November 2006 (2007-05) bulletin had a project that extended KY 313 and I am wondering if

this project is off of that proposed route instead of the existing? If it is off of the proposed route is copies of those plans available?

ANSWER: The project will look at utilizing the existing KY 1500 alignment as well as looking at new alignments starting at KY 313 between 4-297.20 (KY 1500) and KY 1815. Any new alignment alternatives will tie into KY 1646 near the Fort Knox boundary and will consider re-aligning KY 1646 at Bullion Boulevard . Any plans developed by the department or others will be made available to the selected consultant.

**The above Q & A section is dealing with the 2009-01 Project Listing
(Former name Bulletins)**
