Louisville Metro	Jefferson	2540	3217.00	River Road Multi-Modal Improvements - 3rd Street to 7th Street	<p>Re-allocation of the northern most lane traveling in the west bound direction and relocation of the existing barrier wall to expand the existing separated multi-use path of sub-standard width. In addition, street lighting would be updated and placed into the relocated barrier wall to reduce maintenance costs and better illuminate the path beneath the shadow the the interstate.</p> <p>This would be accomplished by transitioning the two westbound lanes between 3rd Street and 4th Street from 13 feet in width to 11 feet in width at 4th Street. This will allow the barrier wall to be moved south four (4) feet, increasing the width of the current shared use path from a sub-standard width of six (6) feet to a conforming width of ten (10) feet. Between 4th Street and 6th Street, we propose to reduce from two westbound lanes to a single westbound lane with a shoulder, allowing the multimodal path to increase to 14 feet in width.</p> <p>This project dovetails with the planned 4th Street bike connection improvement projects which will feed cyclists directly into this project via actuated loops and allow seamless interaction for traffic coming from downtown that desire to travel west along the riverfront. Additionally, the junction at 6th Street will be improved to provide better connectivity with dedicated bicycle facilities on 6th Street. Pedestrian improvements are intended as well at the intersections of River Road with 3rd Street, 4th Street, and 6th Street.</p>	TAP-U	<p>Move Design from FY 2019 to FY 2020</p> <p>Move Construction from FY 2019 to FY 2020</p> <p>In FY 2020 Construction, increase by \$1,000,000 (Federal) for a new cost of this phase:</p> <p>\$1,413,708 (Federal)</p> <p>\$353,427 (Other)</p> <p>\$1,767,135 (Total Cost)</p>
