Other contacts: Phil Logsdon, D7 Environmental Coordinator, 859-246-2355
Becky Barrick, D7 Assistant Environmental Coordinator

Approximate dates: April 24, 2008

May 27, 2008

Comments (number of people reached, effectiveness of the technique, what you would do differently, etc.): This project has much opposition and the visualization was extremely beneficial, especially showing the improved sight distance obtained with the new vertical alignment. These visualizations were used at 3 different Public Involvement Forums with a total of approximately 15-20 citizens viewing the displays. Using photo quality paper makes for a nice display, but sometimes glare can be distracting for the viewer. Using good quality weight paper will make a very nice and durable display as well.
