

## Xerox- State of Kentucky PODD Paper

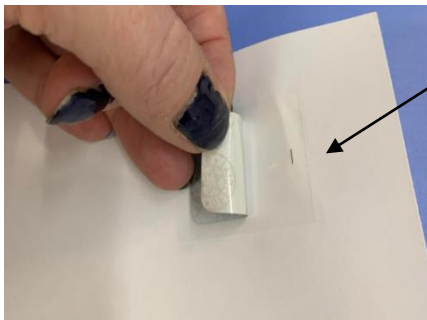

PODD Decal Registrations were evaluated and the following instructions were put together for aid in decal removal. Decals do not tear if they are peeled away @ the right side of the form. See instruction below. If difficulty is still experienced please mark form as defective and send in for tally to be credited to account.

### Recommendations/Actions Needed:

1. Hold form and grab from right side to easily remove.

2. Bend at right corner to begin peeling off label.

**Right Side**

3. Avoid peeling from top left of form, this can cause elongation and decal distortion. If the label becomes distorted it can rip and tear.
